

Slice Collection

A globally Revered Award Winning Design

VISO proudly presents the award-winning Slice Collection, a collaboration between II BY IV DESIGN and VISO.

The Slice Collection encapsulates a paradigm shift in lighting design, seamlessly blending innovation, aesthetics, and functionality.

The Slice Collection not only enhances interior spaces with elegance but also prioritizes sustainability, accessibility, and inclusivity. By incorporating innovative features and sustainable practices, it sets a new standard in lighting design.

Concept :

Each pendant, inspired by the elegance of light filtering through a slender aperture, offers 360-degree sculptural beauty and dual sided illumination.

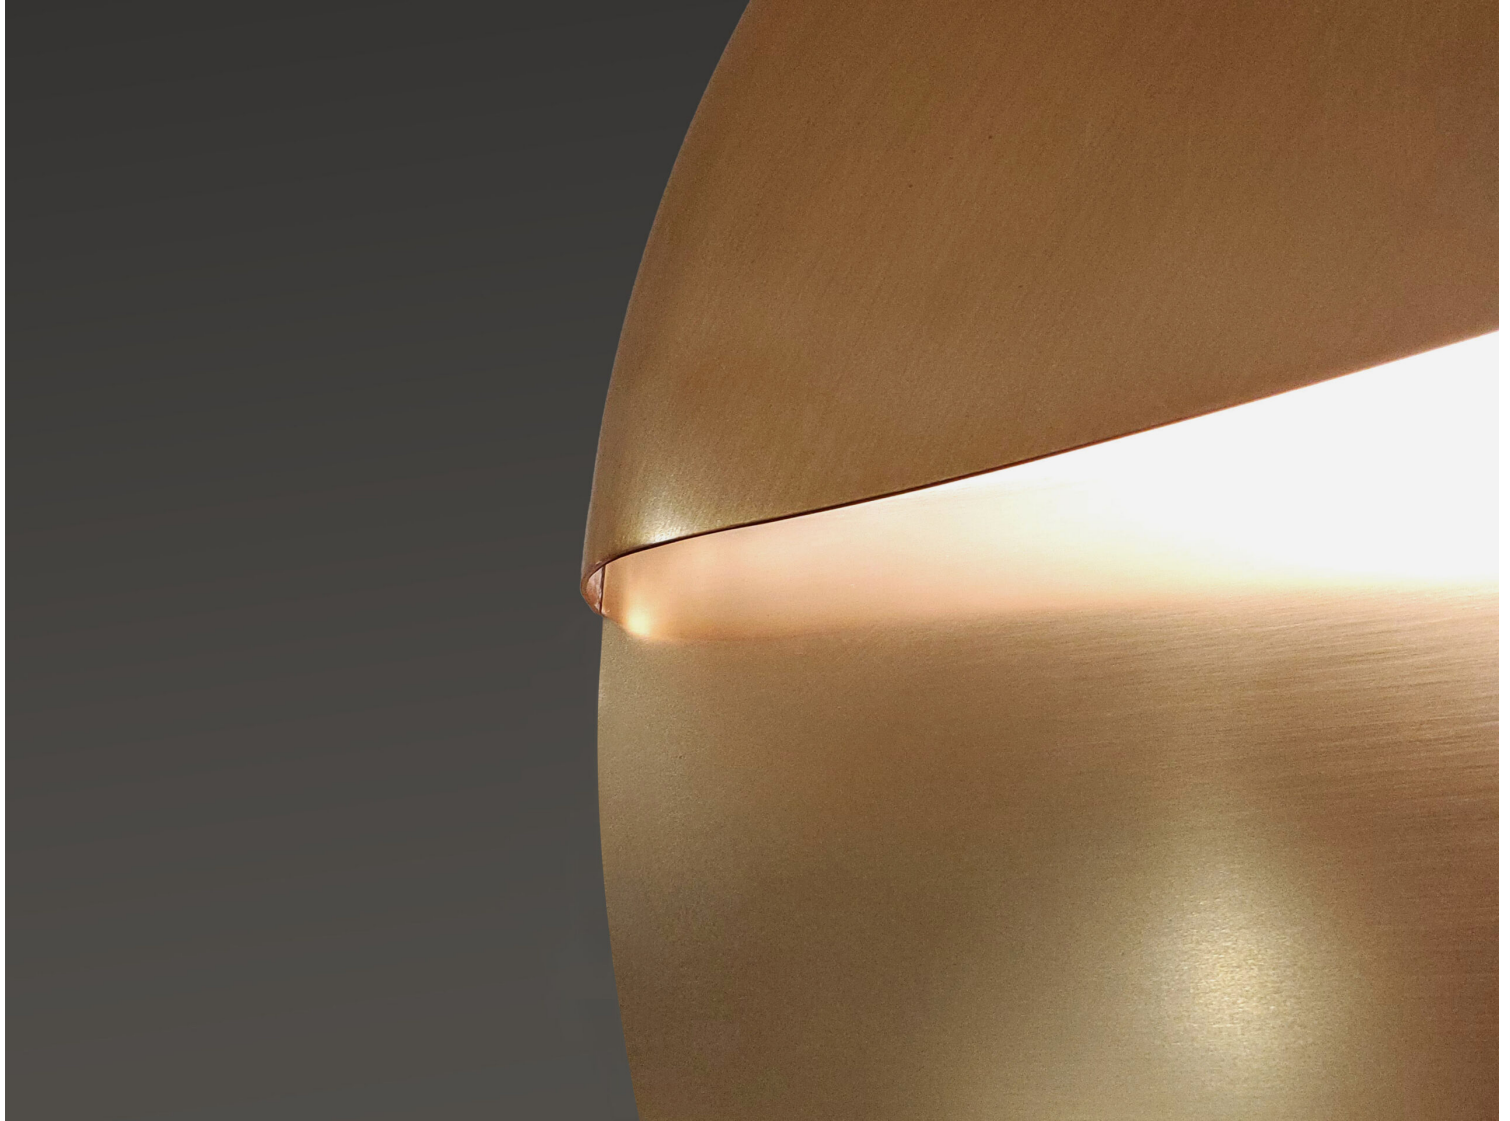

Crafted with flawless precision, these fixtures feature a seamless construction devoid of screws, seam lines or weld marks, showcasing refined craftsmanship.

Design :

Designed ensuring hassle-free maintenance and customization, Slice caters to a wide range of project requirements. Its adaptability to different settings and customizable color temperature options makes it inclusive and versatile.

Available in three sizes

Innovation :

One of the primary challenges the design addresses is achieving a harmonious balance between direct and diffused light to eliminate hot spots, thereby enhancing the ambiance of any space.

Through meticulous engineering and design considerations, the fixtures emit illumination evenly from both sides, resulting in visually pleasing and immersive experiences. Slice can be displayed individually or in a cluster formation for a dramatic chandelier effect.

Technology :

The use of powder-coating or plating for finishing touches enhances durability and aesthetic appeal, extending the lifespan of the fixtures and reducing the need for frequent replacements.

Additionally, the fixtures are crafted with recyclable materials, reflecting a commitment to waste reduction and resource conservation.

Dimensions :

Pendant Dimensions :

Half Dish Thickness : 1.2mm

Color temperature 4000 k

Sphere size, Large : 27 mm

Sphere size Medium :

Sphere size Small
