

The Honey Collection

Shimmering, Innovative and Sweet.

Inspired by the glistening drops of honey, this innovative and luxurious collection brings a touch of elegance to any space. Created by our very own President, Tzetzey, this light pendant has been two years in the making.

The design features four concentric glass globes, elegantly secured to a golden hoop ring, casting a mesmerizing cascade of light. Each glass globe is interchangeable, offering endless possibilities for customization to match any environment, mood, or occasion, while providing the opportunity for playful color experimentation.

The distinctive canopy adds an extra layer of sophistication, transforming this lighting fixture into a stunning statement piece that transcends traditional illumination.

Be the designer of your own light.

Client Need :

The aim in creating the light was to develop a light with a large canopy, that would be a lightweight, elegant and a potentially colorful solution for larger spaces.

The array of 11 colors allows a designer or client to customize the lights.

The outer glass is available in clear, amber, red wine, orange, pink blue, shiny smoke.

Challenge :

The light comprises of two spherical globes, one interior in frosted glass, the exterior is made from Borosilicate glass. When design-engineering the light, VISO aimed to reduce shadow lines at the point where the two spheres are joined.

The structure of the main body and the frames at the base of each globe are made from solid brass therefore adding further weight. To minimize the weight glass selection was very important.

**Solution :**

Borosilicate glass has been used for the fabrication of the exterior sphere. Borosilicate glass is known for being lightweight and uniform in its thickness and consistency.

The result is that each sphere has a consistent glow without heat spots.

A lightweight G4 globe has been installed inside each interior sphere.

At the point where the interior and exterior globes join, a thin layer of clear acrylic resin has been used reducing the shadow line on each globe.

To ensure the main fixture is balanced, an iron filler was added to the points where the cable joins the main body.

Dimensions :

Metal Ring :

Finish : Solid brass

Height : 36"

Width : 36"

Depth : 5.9"

Weight : 10lbs

Canopy Height : 2.75"

Canopy Diameter : 5.5"

Glass Shade Options :

Clear

Amber

Dark Amber

Marigold

Orange

Burgundy

Terracotta

Pink

Neon Pink

Chrome

Purple

Lamp Information :

Bulb Quantity : 4

Bulb Type : G4

Max Wattage : 2.5 W

Bulb Included : Yes

Bulb Color : Warm White

CCT : 2700 K

Total Lumens : 800 LM

CRI : 90 +

Beam Spread : 360 Degrees

Light Direction : Ambient Light

Dimmable : Yes

Electrical Information :

Voltage : 120 V

Approval : ETL

Location : ceiling

Switch : Not Included

Additional Information :

Height Adjustable : Yes

Mounting Options

Installation Position : Ceiling

Sloped Ceiling : Yes

Maximum Slope : 45 Degrees

Recommendation :

Driver to be housed in JBox.
